Hello,

We detected that your live API key **sk_live_*******
*******Q3Uo7v**

is publicly available online. An unauthorized party could use the key to view sensitive information on your accounts or make critical changes, like creating connected accounts, charges, and payouts.

To protect your account, follow the steps below and replace this key with a new one immediately. **If no action is taken, we'll automatically deactivate the exposed key in 7 days.** Once it expires, all API calls—including attempts to process payments or create connected accounts using it—will fail.

Next steps:

Identify and fix the source of the exposed key.

Review your [API logs](#) for any unauthorized activity.

Create a new API key on your [Stripe Dashboard](#) and ensure that the new key is securely integrated into your application.

Deactivate the exposed API key.

Rotate all other live API keys.

[View step-by-step guide](#)

If you have any questions, please visit our [support site](#). We're here to help.

— The Stripe team

This email relates to your [My Oil Sticker](#) Stripe account.
